**Call 812-944-6500 or Toll-free at 866-944-6505
between 9am and 5pm EST Monday through Friday**

What are EasyCataract™ Drops?

- Your doctor has prescribed a specially compounded formula of eye drops called EasyCataract™ that combines 3 different medications into one. This combination will make things more convenient than traditional therapies. Rather than juggling 3 different bottles following 3 different schedules, EasyCataract™ is one bottle with one schedule.

How much do the EasyCataract™ Drops cost?

- EasyCataract™ Drops cost \$75 and will last long enough to cover surgeries of the right and left eye. You will receive 2 bottles, one for each eye. If you are only having one eye done, the cost is \$50. You will receive 1 bottle for one eye. The average patient will save about \$100 by not having to purchase 3 different bottles of drops. Also, approximately \$400-500 will not be charged to the insurance plan, perhaps helping to avoid the 'donut hole'.

How will it be sent? Are there special storage requirements?

- We send all orders approximately 14 days prior to your first surgery. Refrigeration is not required. EasyCataract™ are good for 90 days from their date of creation. Their "best use date" will be on the side of the dropper bottle.

Why are the EasyCataract™ not covered by my insurance?

- Your doctor wants the best outcome for you, so they have prescribed EasyCataract™. Unfortunately, Medicare and most insurance companies do not cover compounded medication.

What should I expect when my package arrives?

- When your package arrives you will receive your drops, either one bottle or two. You will also receive a kit containing a pair of protective sunglasses and a plastic eye shield with paper tape. These will be used after your surgery.
